Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food

Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with <u>straight away</u>.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next <u>2 months</u>.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information**, **Recommendations** of good practice and reminders of **Legal Requirements**.

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area				You Score					
Food Hygiene and Safety				0	5	10	15	20	25
Structure and Cleaning				0	5	10	15	20	25
Confidence in management & control systems				0	5	10	15	20	30
Your Total score	0 - 15	20	25 - 30		35 - 40		45 - 50		> 50
Your Worst score	5	10	10		15		20		-
		F						ſ	
Your Rating is	5	4	3		2		1		0

Your Food Hygiene Rating is 4 - a good standard

1. Food Hygiene and Safety

Food hygiene standards are high. You demonstrated a very good standard of compliance with legal requirements. You have safe food handling practices and procedures and all the necessary control measures to prevent cross-contamination are in place. Some minor contraventions require your attention. (Score 5)

Contamination risks

Contravention The following exposed food to the general risk of cross-contamination with bacteria or allergens or its physical contamination with dirt, foreign objects or chemicals.

- the underside of stacked containers in contact with open food below
- · uncovered foods stored in the fridge
- scoops stored in dried ingredients

Legal requirement At all stages of production, processing and distribution, food must be protected from any contamination likely to render it unfit for human consumption, injurious to health or contaminated in such a way that it would be unreasonable to expect it to be consumed in that state.

Recommendation Chopping/cutting boards were held stable with tea towels/cloths and could contaminate the board. Use silicone board mats to stabilise your cutting boards. These can be placed in the dishwasher and /or can be sterilised.

Hand-washing

Observation I was pleased to see handwashing was well managed.

Personal Hygiene

Contravention The following are examples of poor personal hygiene or where it was made difficult for food handlers to maintain sufficiently high standards of personal cleanliness:

staff were not wearing suitable protective clothing

Legal requirement All persons in food handling areas must wear suitable, clean, and where appropriate protective clothing

Temperature Control

Recommendation it is a government recommendation that eggs are stored in the fridge

Poor Practices

Contravention The following matters represented poor practice and if allowed to continue may cause food to become contaminated or lead to its deterioration:

boxes of food were being stored on the floor. This could cause a contamination issue

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are all of a good standard and only minor repairs and/or improvements are required. Pest control and waste disposal provisions are adequate. The minor contraventions require your attention. (**Score** 5)

Cleaning of Structure

Contravention The following items were dirty and require more frequent and thorough cleaning:

- flooring underneath equipment
- flooring behind equipment

- on top of tiled floor coving
- stainless steel wall

Cleaning of Equipment and Food Contact Surfaces

Contravention The following items are dirty and must be cleaned:

- seals to fridges/freezers
- interior ceiling to microwave
- electric fly killer

Cleaning Chemicals / Materials / Equipment and Methods

Contravention The following evidence demonstrated your cleaning materials, equipment and methods were not sufficient to control the spread of harmful bacteria such as <u>E. coli</u> 0157 between surfaces:

badly worn scourer needs replacing

Observation I was pleased to see that the premises was kept clean and that your cleaning materials, methods and equipment were able to minimise the spread of harmful bacteria between surfaces.

Maintenance

Contravention The following had not been suitably maintained and must be repaired or replaced:

holes to walls

Pest Control

Observation You have a pest control contract in place and there is no evidence of pest activity on the premises.

3. Confidence in Management

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. The contraventions require your attention; although not critical to food safety they may become so if not addressed. (**Score 10**)

Type of Food Safety Management System Required

Observation You were date labelling perishable foods appropriately and could demonstrate effective control over food spoilage organisms.

Observation You had colour-coded equipment and effective separation between raw and ready-to-eat food at all stages in your operation.

Observation You were monitoring (and recording) the temperatures of your fridges and freezers as well as the temperature of cooked/hot-held food and could demonstrate effective systems for controlling bacterial growth and survival.

Contravention The Safer Food Better Business food safety management system you use belonged to the previous Food Business Owner and does not cover some of the catering you are doing. You need to purchase a new pack and fill it in. However I was pleased to see that you ordered a new pack on line in my presence.

Information. As you are a new business you have been given the benefit of the doubt despite your food safety management system not fully complying with the law. You must act on this now as your hygiene rating score will be reduced to a maximum of 1 if there is a similar situational at the next visit

Food Hazard Identification and Control

Contravention You have not identified these food hazards or the methods of control at critical points in your operation:

cross-contamination

Traceability

Observation Your records were such that food could easily be traced back to its supplier.

Infection Control / Sickness / Exclusion Policy

Observation Policies were in place to prevent any infected food handler from contaminating food.

Training

Observation I was pleased to see that food handlers had been trained to an appropriate level and evidence of their training was made available.

<u>Allergens</u>

Contravention You are failing to manage allergens properly:

• you have not adequately labelled the foods you are prepacking for direct sale i.e

- prawn crackers to your customers. The label must include the name of the food and an ingredients list with the 14 allergens emphasised
- pots of sauce ie chilli, vinegar and fish sauce fish, Prawn crackers prawn

Legal requirement The allergen labelling requirements for prepacked for direct sale (PPDS) food have changed. Any business that produces PPDS food is required to label the food and the ingredients list with the 14 allergens required to be declared by law emphasised within it
