

Public Protection (food & safety)

Food Premises Inspection Report

Name of business:	New World Chinese Takeaway
Address of food business:	359 - 361 Aylsham Road Norwich NR3 2RX
Date of inspection:	29/10/2024
Risk rating reference:	24/00454/FOOD
Premises reference:	15/00387/FD_HS
Type of premises:	Food take away premises
Areas inspected:	Main Kitchen, Storeroom
Records examined:	SFBB
Details of samples procured:	None
Summary of action taken:	Informal
General description of business:	Chinese takeaway

Relevant Legislation

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information, Recommendations** of good practice and reminders of **Legal Requirements** .

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area	You Score					
Food Hygiene and Safety	0	5	10	15	20	25
Structure and Cleaning	0	5	10	15	20	25
Confidence in management & control systems	0	5	10	15	20	30
Your Total score	0 - 15	20	25 - 30	35 - 40	45 - 50	> 50
Your Worst score	5	10	10	15	20	-
Your Rating is	5	4	3	2	1	0

Your Food Hygiene Rating is 1 - major improvement is necessary

1. Food Hygiene and Safety

Food hygiene standards are high. You demonstrated a very good standard of compliance with legal requirements. You have safe food handling practices and procedures and all the necessary control measures to prevent cross-contamination are in place. Some minor contraventions require your attention. **(Score 5)**

Contamination risks

Contravention The following exposed food to the general risk of cross-contamination with bacteria or allergens or its physical contamination with dirt, foreign objects or chemicals.:

- bowls stored in dried ingredients
- food stored in open cans in fridge
- uncovered foods stored in fridge

Legal requirement At all stages of production, processing and distribution, food must be protected from any contamination likely to render it unfit for human consumption, injurious to health or contaminated in such a way that it would be unreasonable to expect it to be consumed in that state.

Legal requirement Once opened canned food which is to be stored should be transferred to plastic covered containers, designed for the storage of food, to prevent chemical contamination of the food

Personal Hygiene

Contravention The following are examples of poor personal hygiene or where it was made difficult for food handlers to maintain sufficiently high standards of personal cleanliness:

- staff were not wearing suitable protective clothing
- food handlers wearing gloves but not washing hands

Legal requirement All persons in food handling areas must wear suitable, clean, and where appropriate protective clothing

Legal requirement The way gloves are used in your premises was unhygienic and likely to give rise to a risk of cross contamination. Ensure that hands are always washed thoroughly before putting gloves on and after taking them off. Gloves should be disposable and should always be changed between the handling of raw and ready-to-eat foods. Gloves should also be changed before handling ready-to-eat food if they have come in contact with any surface or objects not designated as clean (e.g. money), and also at every break

Temperature Control

Observation I was pleased to see you were able to limit bacterial growth and/or survival by applying appropriate temperature controls at points critical to food safety and that you were monitoring temperatures.

Poor Practices

Contravention The following matters represented poor practice and if allowed to continue may cause food to become contaminated or lead to its deterioration:

- no date labels on prepared foods of when prepared in the fridge
- no date labels on open foods of when opened in the fridge

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are less than satisfactory and you are failing to comply with the law in many respects. Contraventions require your immediate attention as some are critical to food safety. We may revisit your business and if standards have not improved take formal enforcement action. **(Score 15)**

Cleaning of Structure

Contravention The following items were dirty and require more frequent and thorough cleaning:

- floor/wall junctions
- around equipment feet
- flooring behind and under equipment
- walls especially behind equipment
- wall tiles
- grout to wall tiles
- door
- ceiling
- pipework
- wooden shelving
- hand contact surface (such as fridge handles, cooker knobs, light switches and sink taps)

Information Covering surfaces with aluminium foil leads to a potential contamination risk as the foil breaks up into smaller pieces

Contravention The following structural items could not be effectively cleaned and must be covered or made non-absorbent:

- untreated mdf or wooden shelving

Recommendation Your cleaning schedule is there to remind you to clean before an item becomes dirty. If an item is dirty when you go to clean it, increase the frequency of cleaning.

Recommendation Housekeeping could be greatly improved. Remove redundant items and equipment from food rooms, tidy away miscellaneous objects into drawers and boxes and keep work surfaces and the floor clear for ease of cleaning and disinfection.

Cleaning of Equipment and Food Contact Surfaces

Contravention The following items are dirty and must be cleaned::

- food storage containers
- fridge and freezer seals
- fridge shelving
- interior to fridge doors
- interior to bottom to fridges
- interior fan and cover to fridge
- electric fly killer and tray
- top to freezer door
- handle to freezer door
- legs to equipment
- wheels to equipment
- sides to equipment

- lid to bin
- lid to container storing chilli oil
- around interior top to rice cookers
- handle to rice cookers
- containers
- bowl
- lid to bin
- electric fly killer and tray

Cleaning Chemicals / Materials / Equipment and Methods

Contravention The following evidence demonstrated your cleaning materials, equipment and methods were not sufficient to control the spread of harmful bacteria between surfaces:

- badly worn scourer

Maintenance

Contravention The following had not been suitably maintained and must be repaired or replaced:

- broken food storage containers
- handle to lid to container storing chilli oil
- damage to interior to microwave

Facilities and Structural provision

Observation I was pleased to see that adequate facilities had been provided.

Pest Control

Contravention Pest proofing is inadequate particularly in the following areas:

- doors left open to outside storerooms

Recommendation provide fly screens to openable windows and external doors in rooms in which food is prepared and handled

3. Confidence in Management

There is major non-compliance with legal requirements. The contraventions require your urgent attention. A revisit is planned and formal enforcement action is likely. **(Score 20)**

Type of Food Safety Management System Required

Observation You had colour-coded equipment and effective separation between raw and ready-to-eat food at all stages in your operation.

Food Hazard Identification and Control

Contravention The following pre-requisites have not been met and this means that your food safety management system will be ineffective:

- cleaning and sanitation are poor
- staff hygiene is inadequate
- staff training is inadequate

Contravention The Safe Methods in your Safer Food Better Business (SFBB) pack are intended to show you have identified the hazards to food and what you must do to control them. The following Safe Methods were either missing from your SFBB pack or had not been completed appropriately:

- Chilling
- Cleaning
- Cooking
- Cross-contamination

Proving Your Arrangements are Working Well

Contravention The Management sections in your Safer food Better Business (SFBB) pack are intended to demonstrate you are in day-to-day control of the hazards to food. The following Management sections were either missing, incomplete or not up-to-date:

- daily diary entries not up to date
- additional checks
- four-weekly reviews
- cleaning schedule
- suppliers list
- contacts list
- staff SFBB training records
- prove-it records
- food safety issues not adequately reported in diary

Information The absence of complete documentation has resulted in a poor score for confidence in management and this, in turn, has had an adverse effect on your Food Hygiene Rating.

Information Before implementing a food safety management system such as Safer Food Better Business, basic good hygiene conditions and practices called prerequisites must be in place. Only then will your food safety management system be effective in ensuring the preparation of safe food.

Infection Control / Sickness / Exclusion Policy

Guidance UK Health Security Agency recommends that food handlers known or suspected to be suffering from a food-borne infection or gastrointestinal illness stay away from work until symptom-free for 48 hours.

Training

Contravention The following evidence indicates there is a staff training need as food handlers:

- standard of cleaning was poor
- were not washing their hands often enough
- not wearing appropriate protective clothing

Allergens

Contravention You are failing to manage allergens properly:

- you have not adequately labelled the foods you are prepacking for direct sale to your customers i.e prawn crackers. The label must include the name of the food and an ingredients list with the 14 allergens emphasised

Legal requirement The allergen labelling requirements for prepacked for direct sale (PPDS) food have changed. Any business that produces PPDS food is required to label the food and the ingredients list with the 14 allergens required to be declared by law emphasised within it

Recommendation for information or advice about prepacked food for direct sale (PPDS) contact Norfolk Trading Standards on 0344 800 8020 or email : trading.standards@norfolk.gov.uk

Information Prepacked for direct sale (PPDS) food, is food that is packaged at the same place it is offered or sold to consumers, and is in this packaging before it is ordered or selected by your customers. The new PPDS allergen labelling will help protect consumers by providing potentially life-saving allergen information on the packaging

Information Prepacked for direct sale (PPDS) food can include the following:

- sandwiches and bakery products which are packed on site before a consumer selects or orders them
- fast food packed before it is ordered, where the food cannot be altered without opening the packaging
- products which are prepackaged on site ready for sale, such as pizzas, rotisserie chicken, salad and pasta pots
- burgers and sausages prepackaged by a butcher on the premises ready for sale to consumers

- food provided in schools, care homes or hospitals and other similar sittings will also require labelling
- pots served with takeaways such as garlic mayonnaise (egg, mustard), houmous (sesame), coleslaw (egg, mustard) mint yoghurt (milk), soy sauce (soy)

Information food which is not prepacked for direct sale (PPDS) is any food that is not in packaging or is packaged after being ordered by the consumer. These are types of non-prepacked food and do not require a label with name, ingredients and allergens emphasised. Allergen information must still be provided but this can be done through other means, including orally

Information The Food Standards Agency run free allergen courses at <https://allergytraining.food.gov.uk>
