

Public Protection (food & safety)

Food Premises Inspection Report

Name of business: TopG Wings

Address of food business: 31 St Augustines Gate Waterloo Road Norwich NR3 3BE

Date of inspection: 28/01/2025
Risk rating reference: 25/00108/FOOD
Premises reference: 24/00297/FD_HS

Type of premises: Restaurant or cafe

Areas inspected: All

Records examined: SFBB, Pest Control Report

Details of samples procured: None Summary of action taken: Informal

General description of Chicken Takeaway and Restaurant

business:

Relevant Legislation

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food

Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law. You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with <u>straight away</u>.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next <u>2 months</u>.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information**, **Recommendations** of good practice and reminders of **Legal Requirements**.

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area				You Score					
Food Hygiene and Safety				0	5	10	15	20	25
Structure and Cleaning				0	5	10	15	20	25
Confidence in management & control systems				0	5	10	15	20	30
Your Total score	0 - 15	20	25 - 30		35 - 40		45 - 50		> 50
Tour Total Score	0 - 15	20	۷.) - 30 	35 - 40		45 - 50		<i>></i> 50
Your Worst score	5	10	10		15		20		-
Your Rating is	5	4	3		2		1		0

Your Food Hygiene Rating is 4 - a good standard

1. Food Hygiene and Safety

Food hygiene standards are high. You demonstrated a very good standard of compliance with legal requirements. You have safe food handling practices and procedures and all the necessary control measures to prevent cross-contamination are in place. Some minor contraventions require your attention. (Score 5)

Contamination risks

Contravention The following exposed food to the general risk of cross-contamination with bacteria or allergens or its physical contamination with dirt, foreign objects or chemicals:

- outer cardboard boxes in the fridge with ready to eat items. Remove outer packaging.
- loose plastic covering new equipment should be removed

Guidance The FSA (visit www.food.gov.uk for more information) has issued guidance on controlling E.coli 0157 through:

•the complete separation of raw and ready-to-eat food

- the correct use of wash-hand basins and thorough handwashing
- •having dedicated equipment (including complex equipment) for raw and ready-to-eat
- thorough 2-stage cleaning and the correct use of sanitisers
- •and by controlling the risks posed by soily vegetables.

Guidance If equipment and utensils (for example chopping boards, containers and tongs) are to be used for raw and RTE foods, they should be disinfected by heat or an adequate dishwasher cycle (able to reach 82°C for 15 seconds) between uses. As you do not have a dishwasher or a double sink you will need to ensure no equipment is shared. It is recommended this is done by colour coding.

Observation I was pleased to see you were generally able to demonstrate effective controls to prevent cross-contamination.

Hand-washing

Observation I was pleased to see hand washing was well managed.

Personal Hygiene

Observation I was pleased to see that standards of personal hygiene were high.

Temperature Control

Contravention The following evidence indicated there was a risk of bacteria growing on food:

- no bain marie temperature monitoring checks are taking place, and high risk sauce is being held there all shift 9cheese sauce with milk). Food being held hot in there must be held at above 65 °C or if at a lower temperature, used within 2 hours.
- the Buffalo sauce is made and heated to 75 °C but the cheese sauce is heated slowly in the bain marie. Ensure sauces are cooked and reheated swiftly to 75°C. The bain marie should not be used to reheat foods.
- currently bain marie containers are replenished every 2 days, and when not in the bain marie are not kept in the fridge. Any high risk sauce must be cooled and refrigerated when not in the bain marie.

Recommendation That batches of sauce are made daily, or each batch divided into smaller quantities. One reheated at a time for the bain marie, the others kept in the fridge until used.

Guidance It is essential to know that your probe thermometer is working properly. If the reading is outside these ranges you should replace your probe or return it to the manufacturer to be calibrated. A simple way to check a digital probe is to put it in iced water and boiling water:

- The readings in iced water should be between -1°C and 1°C.
- The readings in boiling water should be between 99°C and 101°C.

Unfit food

Legal Requirement High risk items have a use by date. After this date you must not sell, use or intend to these foods. Make sure you have regular checks in place to remove out of date items

Poor Practices

Contravention The following matters represented poor practice and if allowed to continue may cause food to become contaminated or lead to its deterioration

• cheese past own label of use by 27, in fridge

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are all of a good standard and only minor repairs and/or improvements are required. Pest control and waste disposal provisions are adequate. The minor contraventions require your attention. (Score 5)

Cleaning of Structure

Contravention The following items were dirty and require more frequent and thorough cleaning:

• hand contact surface of fridge handles

Contravention The following items could not be effectively cleaned and must be covered, made non-absorbent or replaced:

bare wood to new shed and high level box shelf in kitchen.

Observation The kitchen had been well maintained and the standard of cleaning was good.

Cleaning Chemicals / Materials / Equipment and Methods

Observation I was pleased to see that the premises was kept clean and that your cleaning materials, methods and equipment were able to minimise the spread of harmful bacteria between surfaces.

Maintenance

Observation You are maintaining the premises in good condition.

Facilities and Structural provision

Contravention The following facilities were inadequate and must be improved

no toilet lobby as second door missing. This should be replaced.

Recommendation The ceiling structure is concrete and high, with ducting and pipes hanging below. It was clean at the inspection, but this will be difficult to clean due to its height. I recommend you consider under drawing the current ceiling with a suspended ceiling made of a smooth and washable finish.

Pest Control

Observation I was pleased to see that the premises was proofed against the entry of pests and that pest control procedures were in place.

3. Confidence in Management

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. The contraventions require your attention; although not critical to food safety they may become so if not addressed. (Score 10)

Type of Food Safety Management System Required

Information As you are a new business you are permitted the flexibility of extra time to get your food safety management system up to the minimum legal requirements. You must act on this now as your food hygiene rating score may be reduced to a maximum of 1 if the food safety management system does not fully meet the legal standard by the time of the next statutory inspection.

Information The absence of complete documentation has resulted in a poor score for confidence in management and this, in turn, has had an adverse effect on your Food Hygiene Rating. You had a SFBB pack but had not completed the front sections and were not carrying out a 4 weekly review.

Observation You were date labelling perishable foods appropriately and could demonstrate effective control over food spoilage organisms.

Observation You had colour-coded equipment and effective separation between raw and ready-to-eat food at all stages in your operation.

Food Hazard Identification and Control

Contravention You have not identified these food hazards or the methods of control at critical points in your operation:

• bacteria growing on food.

Contravention The following SAFE METHODS are missing from your Safer Food Better Business pack:

- Chilling
- Cleaning
- Cooking
- Cross-contamination

Proving Your Arrangements are Working Well

Contravention You are not working to the following safe methods in your SFBB pack:

• 4-weekly checks

Infection Control / Sickness / Exclusion Policy

Guidance UK Health Security Agency recommends that food handlers known or suspected to be suffering from a food-borne infection or gastrointestinal illness stay away from work until symptom-free for 48 hours.

Observation Policies were in place to prevent any infected food handler from contaminating food.

Waste Food and other Refuse

Observation You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor.

Training

Information You can obtain a list of the training courses we provide on our website www.norwich.gov.uk

Observation I was pleased to see that food handlers had been trained to an appropriate level and evidence of their training was made available.

Allergens

Observation You had identified the presence of allergens in your non-prepacked food and had brought this to the attention of your customers.
